Considering the number of TV commercials that involve accidental pregnancies, any couple could be forgiven for thinking that a child is made practically the first time you have unprotected sex. Real life, though, is a little more complicated. Women have a reproductive window of about six days each menstrual cycle, which means that staying pregnant on purpose involves some preparation. How do you know when this magic window of fertility is? Start by following your menstrual cycles (i.e. keeping a record of your period and some other monthly changes). With a little know-how, you can begin to understand how long your cycles are, when you typically ovulate, and when you are most likely to become pregnant. You can do this job on paper, but let226; Face it: Having an app handy is much easier (moreover, it can do all the fertility math for you). If you are reading ready to begin or are even just thinking about something here is the best fertility apps to download ASAP. But instead of using a fixed algorithm to determine your fertility, Flo uses artificial intelligence to get to know you, playing fertility detective with all the symptoms that follow you every month. It's a big difference: For women with irregular cycles, it can be hard to rely on an app to paint an accurate picture of your fertility. Most will use the data you enter to calculate the average length of most other women's cycles (or use the average length of most other women's cycles), and then calculate the average length of most other women's cycles (or use the average length of your cycles are longer than 32 days or, most importantly, if they vary in length, an app's fixed algorithm may not be able to customize its predictions for you. That's not Flo's case. Its makers claim that all women can use the app to better understand and predict their fertility, including women with irregular ones, but at least you can count on Flo to consider this. In addition, the app does everything for free. A fertility app is a great way to keep your fertility on top of your mind when you will be more likely to conceive. The Tracker App Fertility are downloadable programs on smartphones and tablets to help you monitor your menstrual cycles. They are usually centered on a monthly calendar, so that you can enter the main symptoms of fertility: baseline body temperature, bleeding or spots, cervical mucus and receive individualized information about where you are in the menstrual cycle. Most apps also take fertility monitoring one (or more) steps forward, inviting you to insert things like PMS symptoms and daily welfare information to get an even clearer picture of your health. In some apps, you can connect with a private online community or receive reliable health advice on your fertility from professionals. Most women today are more comfortable with digital recording platforms than writing it all on a calendar. Many fertility apps also do the legwork for you, helping you predict when you might ovulate or be fertile, when you can expect the next cycle, or what your of symptoms, cycles and graphs could mean for your general framework of reproductive health. Keep in mind, though, that most applications use standard algorithms to predict fertility control points menstruation and ovulation; if you have irregular or longer-than-average cycles, your data cannot be aligned with application for fertility, as most of them are flexible enough to accommodate any data you choose to enter. Commonly, women who use fertility apps want to: keep track of their periodsManage PMS symptoms monthly Avoid pregnancy (with or without additional fertility measures) Traces signs and symptoms of menopause Gain a more understanding 1 clear of their overall health as it relates to their menstrual cycle Most fertility applications are free to download and use on a basic level (i.e. entering calendar data on periods and ovulation). Many remain free even when users have access to additional features such as forums, fertile days reminders, health information and predictive data. Some paid options for in-app purchases of advanced features and some come with associated charges (i.e. app-linked thermometers or lifetime memberships). If you're having a period, you should use a fertility app is not a substitute

for regular visits to a gynecologist or a reproductive health doctor. If you have been trying to conceive for more than a year without becoming pregnant, have extremely painful PMS symptoms or excessive menstrual bleeding, have irregular periods, or think you are pregnant, make an appointment with a doctor.
