Square root of 490

Square root of 490 000. Square root of 4900. Square root of 490 simplified. Square root of 4900 by division method. Square root of 490/10. Square root of 490 in radical form. Square root of 490.5. Square root of 49000. = 22.1359436.

Command Line: Use Alt + F2 Edit in the directory that contains the files you want to change. Use sudo in front of your command that changes permissions, owner and group of such files. You will be asked for the password and the command will run as if you were root. You could also sudo up to enter root. $ sudo on [sudo] Password for {username}: root @ {host}: / home / {username} # then move to the directory containing your files you want to change. Authorization is modified with CHMOD Example: CHMOD 755 Somefile will make it read, write, perform for your owner and read, perform for group and others. The user and group have changed as an example: chown Alan: Alan Somefile will make Alan Somefile's owner. Edit: After reading the published link, I have a question! Hasn't this topic answered your question yet? It's about running Gksu Nautilus. This option lets you use Nautilus as a root user. This would allow you to change access (see the image in that topic). Chapter 1: Introduction to R # NewData
